

What is ML?

Field of study that gives computers the ability to learn without being explicitly programmed.

Machine learning  
↓  
com  
puter

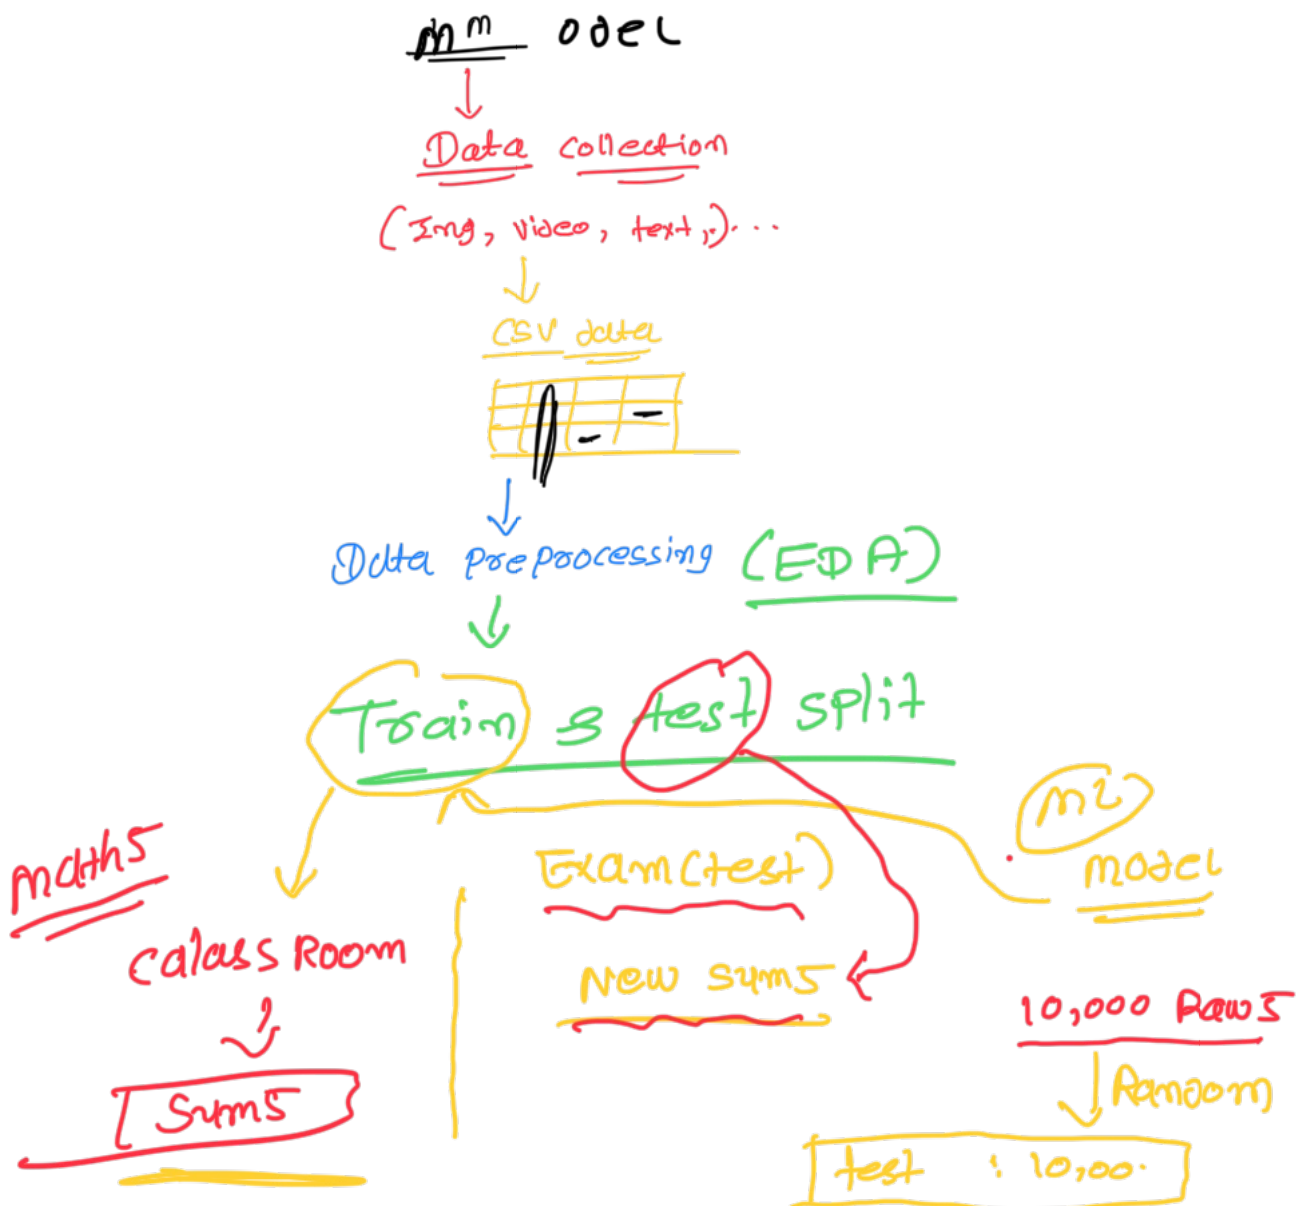

Code → machine allow to learn

ML → learning by model  
it self.

- ① Supervised ml. → Data + label
- ② Un " " " " → Data (clustering)
- ③ Reinfor . . . . → Experiment

1. a : classification : categorical

1. b : Regression : number
